

GSM CENO

Data Sheet

Greenbone
Sustainable Resilience

The **Greenbone Security Manager (GSM)** is a Vulnerability Management Solution that integrates seamlessly and transparently into your security and GRC strategy, providing vulnerability assessment, vulnerability intelligence and threat management capabilities. Identifying breaches of corporate security policy and regulations is covered as well.

With a strong focus on 3rd party integration and open standards, the GSM is a best of breed security solution that enhances and supplements your security posture and allows a proactive approach to automated Vulnerability Life Cycle Management.

The **GSM CENO** covers up to 500 IP addresses. The operational areas are small to medium enterprise IT or medium offices.

Benefits

- Turn-key solution: operational within 10 minutes
- Powerful appliance operating system Greenbone OS with command line administration bases on a comprehensive security design
- Integrates the Greenbone Security Feed with over 69,900 Vulnerability Tests, automatically updated daily with the newest threat detection routines
- Integrated GOS-Upgrade
- Integrated Greenbone Security Assistant as central web interface
- No limitation on number of target IP addresses (effective number depends on scan pattern and scanned systems)
- Flat-rate subscription includes the Platinum Support package, the Greenbone Security Feed and feature updates

Specifications

Virtual Appliance Format

The following Hypervisor are supported:

- VMware ESXi

Appliance Details

- 64 bit Linux OS
- 2 vCPUs
- 8 GB RAM
- 32 GB HDD Storage

Connectivity

- 4 virtual Ethernet Ports

Solution Elements

- Virtual Appliance
- 1, 3 or 5 years access to the Greenbone Platinum Support

Data Sheet

Greenbone
Sustainable Resilience

Supported Standards

- Network integration: SMTPS (Email), LDAP, RADIUS, DHCP, IPv4/IPv6
- Vulnerability detection: CVE, CPE, CVSS, OVAL
- Network scans: WMI, LDAP, HTTP, SMB, SSH, TCP, UDP, etc.
- Policies: Baseline security, PCI-DSS, ISO 27001

Web-based interface (HTTPS)

- Scan tasks management with notes and false-positives marking
- Multi-user support
- Clustered and distributed scanning via sensor mode
- Report browsing aided by filtering, sorting, annotating and risk scoring
- Plugin framework for reports: XML, PDF, etc.
- Appliance performance overview

Integration (API)

- Greenbone Management Protocol (GMP), secured
- All user actions of web-based interface available via API
- Easy integration with other applications using the API
- Simple automation via command line tools

Administration Console Interface

- Network integration and configuration
- Upgrade

Scan-Application

- Scan Engine and Framework: Greenbone Vulnerability Manager (GVM) with integrated Greenbone Security Feed (GSF)
