

GSM MAVEN

Data Sheet

Greenbone
Sustainable Resilience

The **Greenbone Security Manager (GSM)** is a Vulnerability Management Solution that seamlessly and transparently integrates into your Security and GRC strategy, providing Vulnerability Assessment, Vulnerability Intelligence and Threat Management capabilities. Identifying breaches of corporate security policy and regulations is covered as well.

With a strong focus on 3rd party integration and open standards, the GSM is a best of breed security solution that enhances and supplements your security posture and allows a proactive approach to automated Vulnerability Life Cycle Management.

The **GSM MAVEN** covers up to 300 IPs in a 24h time frame. The operational areas are small and micro-sized enterprises, wanting their IT to be scanned for vulnerabilities.

Benefits

- Turn-key solution: operational within 10 minutes
- Powerful appliance operating system Greenbone OS with command line administration based on a comprehensive security design
- Integrates the Greenbone Security Feed with over 64,000 Network Vulnerability Tests, automatically updated daily with the newest vulnerability detection routines
- Integrated Update
- Integrated Greenbone Security Assistant as central web interface
- No limitation on number of target IPs (effective number in 24h depends on scan pattern and scanned systems)
- Flat rate subscription includes the Email Support package, the Greenbone Security Feed and feature updates

Specifications

Virtual Appliance Format

OVA can be imported into the following virtualization environments:

- VMWare
- Microsoft Hyper-V
- Oracle Virtual Box

Appliance Details

- 64bit Linux OS
- 2 CPUs
- 4GB RAM
- 16GB HDD Storage

Connectivity

- 1 virt. Ethernet Port

Solution Elements

System includes

- Virtual Appliance
- 1 year Greenbone Security Feed
- Base Support

GSM MAVEN

Data Sheet

Greenbone
Sustainable Resilience

Supported standards

- Network integration: DHCP, IPv4/IPv6
- Vulnerability detection: CVE, CPE, CVSS
- Network scans: WMI, HTTP, SMB, SSH, TCP, UDP, etc.
- Policies: IT-Grundschutz, PCI-DSS, ISO 27001

Web-based interface (HTTPS)

- Scan tasks management with notes and false-positives marking
- Multi-user support
- Report browsing aided by filtering, sorting, annotating and risk scoring
- Plug-in framework for reports: XML, PDF, etc.
- Appliance performance overview

Integration (API)

- Greenbone Management Protocol (GMP), secured
- All user actions of web-based interface available via API
- Easy integration with other applications using the API
- Simple automation via command line tools

Administrative console interface

- Network integration and configuration
- Update

Scan-Application (approved and customized versions)

- Scan engine and framework: GVM with integrated Greenbone Security Feed
- License key tied to appliance

Web

API

CLI

```

$# cat /etc/passwd | grep root
root:x:0:0:root:/bin:/usr/sbin/passwd

$# cat /etc/passwd | grep root
root:x:0:0:root:/bin:/usr/sbin/passwd

$# cat /etc/passwd | grep root
root:x:0:0:root:/bin:/usr/sbin/passwd

$# cat /etc/passwd | grep root
root:x:0:0:root:/bin:/usr/sbin/passwd

$# cat /etc/passwd | grep root
root:x:0:0:root:/bin:/usr/sbin/passwd
    
```
